

Flood Hazard Map

Planned scale version:
Heavy rainfall that occurs once in about 30 to 150 years

Please pay attention!

This map (Kan-non Riv. version) displays predicted flood damage (planned scale version) when eight rivers on the right table inundate and overflow or destroy riverbanks. Please check nearby shelters for emergencies.

Depending on the degree of rainfall, flood can happen even in the area with no specific color indicating flooding. So, please evacuate immediately when you feel danger.

Names of the rivers expected to cause flood damage in Awara City	Planned scale
	Total amount of rainfall
Kuzuryu River	327mm (in 2 days)
Takeda River ※1	237mm (in 1 day)
Kumasaka River-Shimokanaya River	198mm (in 1 day)
Gonze River	198mm (in 1 day)
Kitagata Lake	280mm (in 2 days)
Kan-non River	198mm (in 1 day)
Miyadani River	237.3 mm (in 1 day)
Daishoji River	340mm (in 2 days)

※1 Takeda River includes Tajima River and Takana River. from "Area map of expected flood and inundation of Kuzuryu River and Hino River in Kuzuryu River system" issued in June, 2016

Public facilities (Emergency contact)

Classification	Name	Location	Phone number
Public organization	Awara City Hall	3-1-1 Ichihime	73-1221
	Sakai Health and Welfare Center	2-21-17 Harumiya	73-0600
	Reihoku Awara fire station	5-2-3 Hananomori	73-0119
Disaster prevention organization	Emergency branch office of Reihoku Awara fire station	29-23-50 Shimokanaya	75-2119
	Awara police station	35-103 Ieyoshi	73-0110
	Hosorogi residential police box	10-1-2 Taki	75-1501
	Yoshizaki residential police box	2-1001 Yoshizaki	75-1950
Emergency hospital	Kimura Hospital	57-25 Kitakanazu	73-3323
	Kano Hospital	1-2-39 Hananomori	73-1001

※ The location of public organization and emergency hospital is not displayed in Planned scale version.

Namimatsu Elementary School

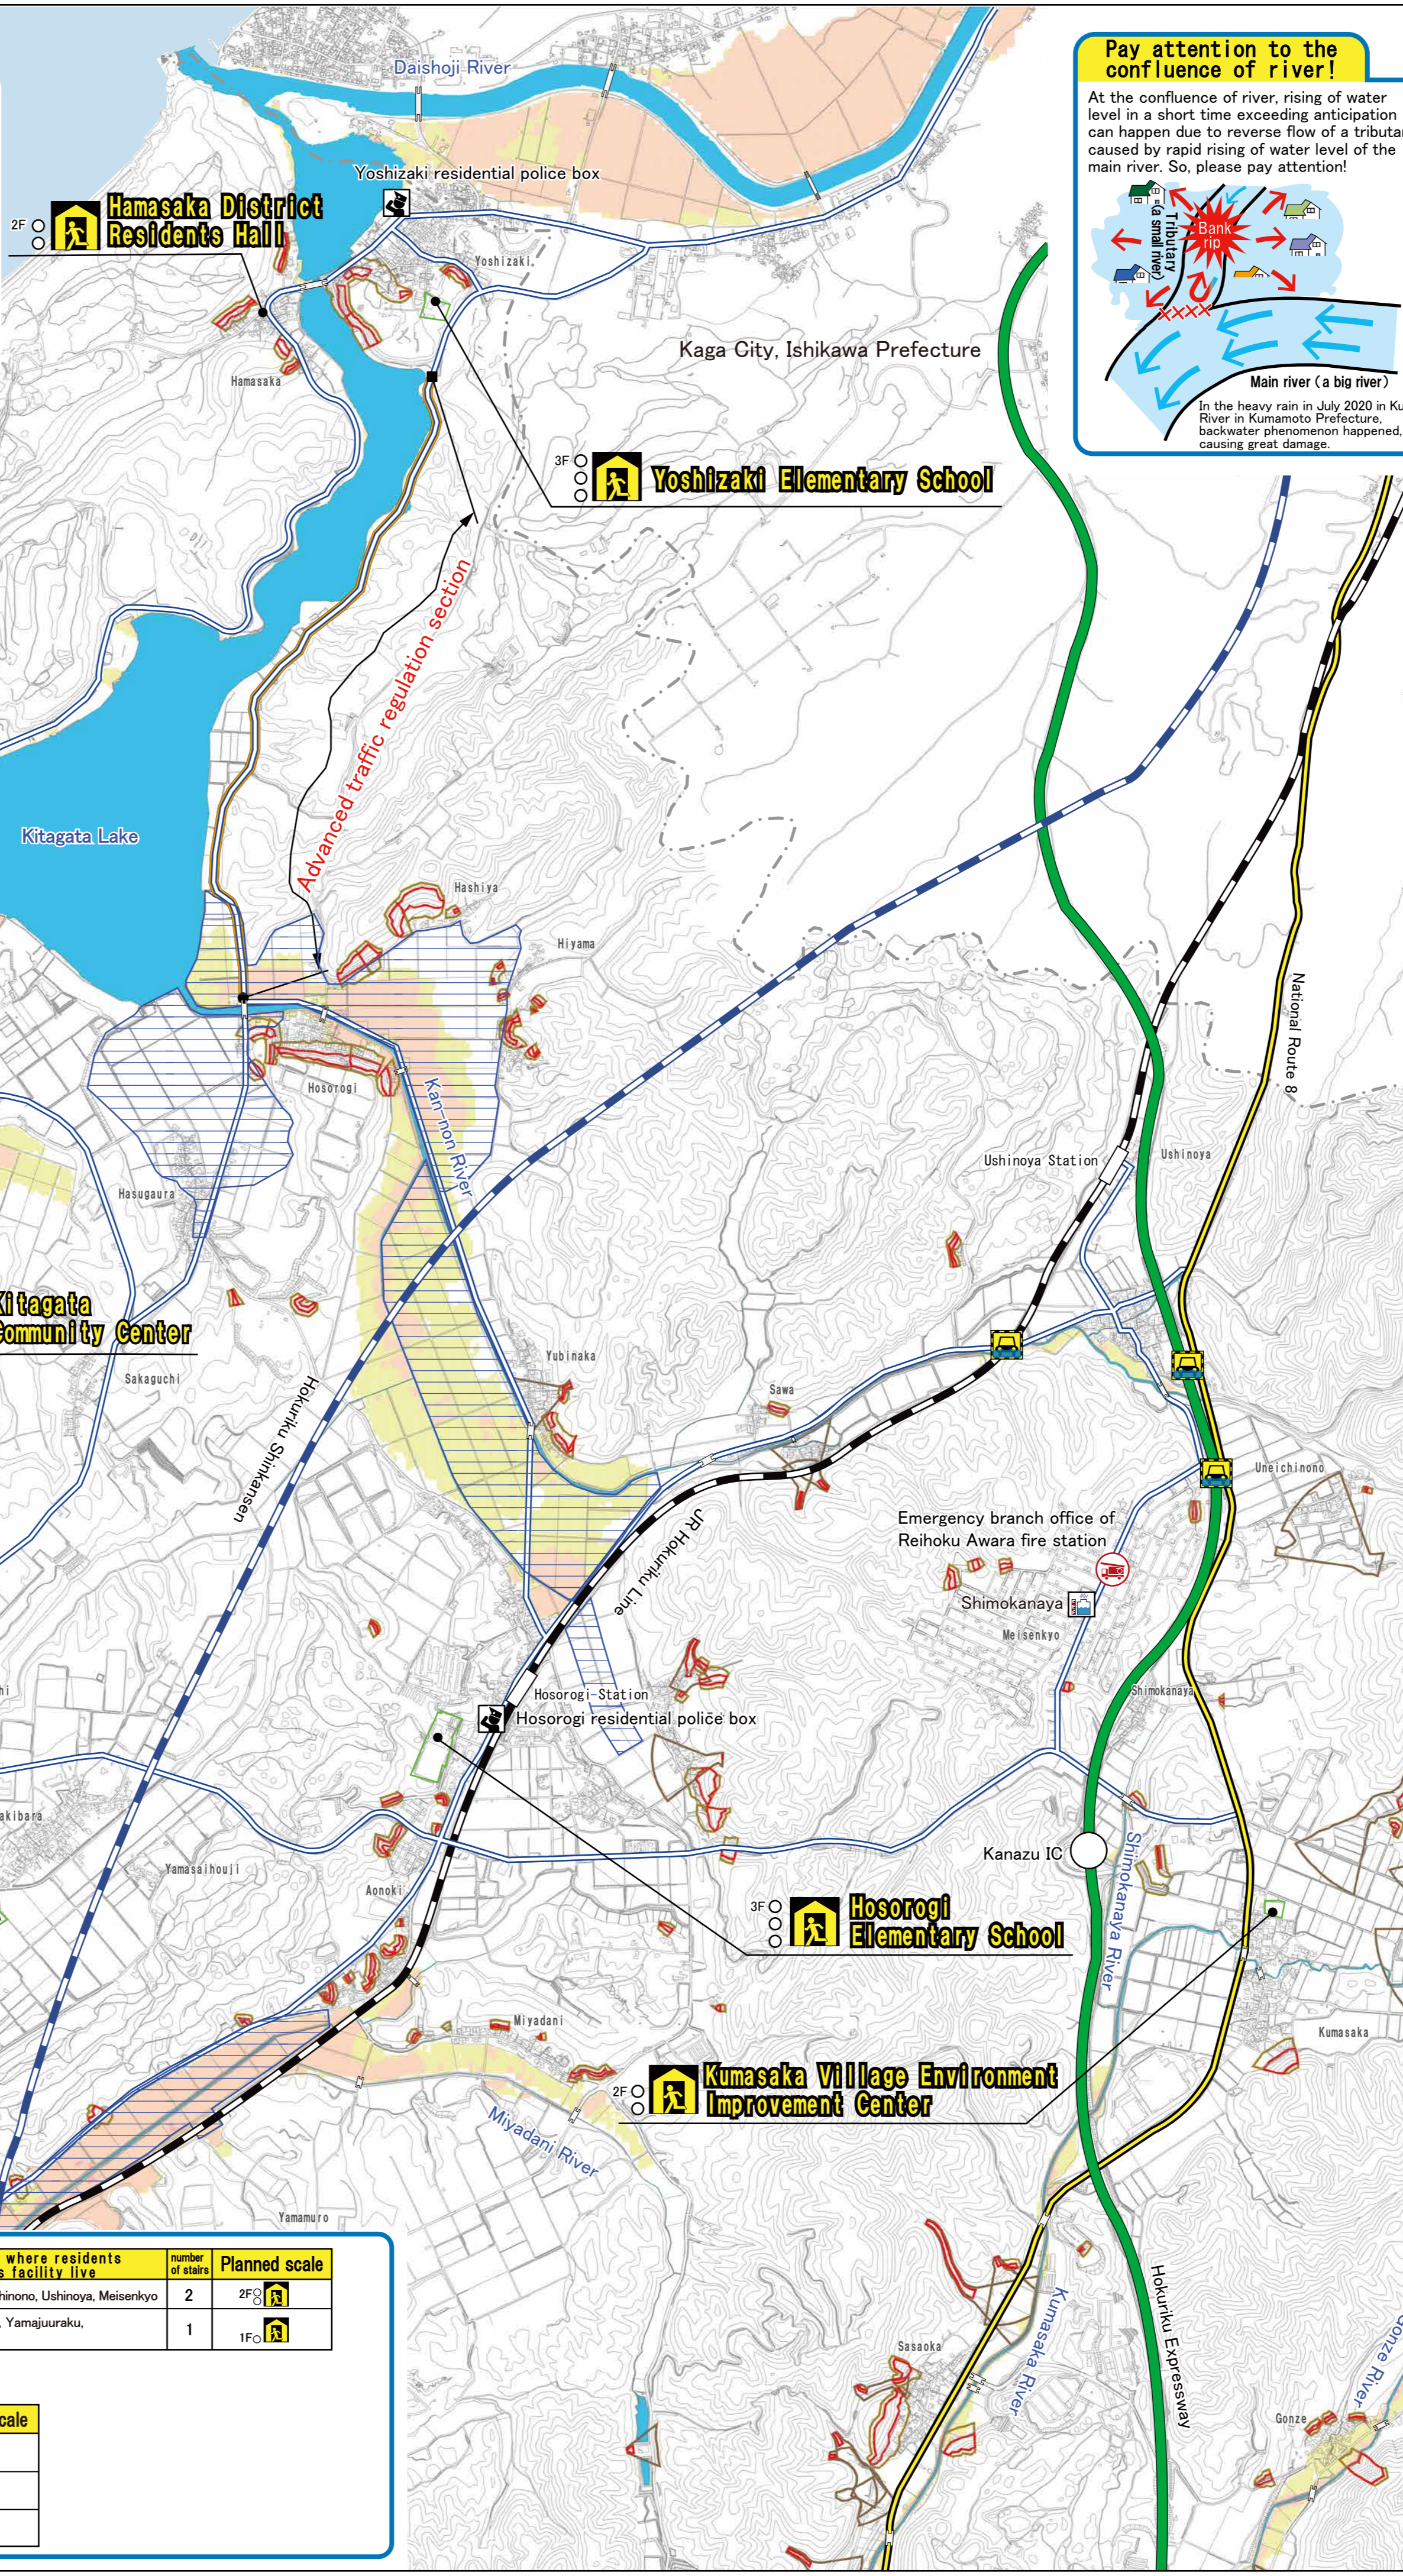

Awara Citizen Martial Arts Stadium

List of evacuation places and shelters

Names of facilities	Location	Name of the district where residents who evacuate to this facility live	number of stairs	Planned scale
Awara Middle School	2-75 Funatsu	Funatsuonsen, Futaomoteonsen	3	3F
Awara Citizen Martial Arts Stadium	2-81 Funatsu	Funatsu, Matsukage	1	1F
Farmers Training Center	23-1 Kunikage	Futaomote, Ushiyama, Kunikage, Shinsei, Ieyoshi, Yokogaki, Miyosou, Sakura	2	2F
Kitagata Elementary School	35-11 Kitagata	Kitagatahigashi, Kitagatanishi, Tomitsu	2	2F
Kitagata Community Center	150-1 Kitagata	Akao	2	2F
Hamasaka District Residents Hall	4-5 Hamasaka	Hamasaka	2	2F
Namimatsu Elementary School	25-1 Namimatsu	Namimatsu, Jou, Joushinden, Bandono, Jusou	2	2F
Hosorogi Elementary School	63-8 Taki	Taki, Aonoki, Miyadani, Sakaguchi, Hasugaura, Hosorogi, Hashiya, Hiya, Yubinaka, Sawa, Hosorogi-ekimae	3	3F
Yoshizaki Elementary School	8-55 Yoshizaki	Yoshizaki1, Yoshizaki2	3	3F

Names of facilities	Location	Name of the district where residents who evacuate to this facility live	number of stairs	Planned scale
Kumasaka Village Environment Improvement Center	42-20 Kumasaka	Kumasaka, Shimokanaya, Uneichinono, Ushinoya, Meisenkyo	2	2F
Multi-purpose joint use facility Sakura Center	36-20 Kakibara	Seiou, Yamasaihouji, Kakibara, Yamajuuraku, Yomeodoshi, Hinode	1	1F

No.	Names of facilities	Location	number of stairs	Planned scale
1	Awara Melon-en	50-18 Ieyoshi	3	3F
2	Hasunomi no ie	87-26-2 Futaomote	2	2F
3	Yunomachi Melon-en	42-20 Futaomote	3	3F

Pay attention to the confluence of river!

At the confluence of river, rising of water level in a short time exceeding anticipation can happen due to reverse flow of a tributary caused by rapid rising of water level of the main river. So, please pay attention!

Main river (a big river)

In the heavy rain in July, 2020 in Kuma River in Kumamoto Prefecture, backwater phenomenon happened, causing great damage.

Explanatory notes

Area where early evacuation is required

Areas where inundation height exceeds 3 meters (2nd floor level)

Standard of inundation height

10.0m Over 10.0m in depth
5.0m From 5.0m to less than 10.0m in depth
3.0m From 3.0m to less than 5.0m in depth
0.5m Less than 0.5m in depth

Inundation area in the past

Description on the section of advanced traffic regulation

Advanced traffic regulation area refers to the section where "traffic suspension" is made when disasters are likely to happen due to heavy rain, etc.

Designated shelters

- Designated place for emergency evacuation
- Welfare shelter
- Designated shelters
- Underpass
- Police station
- Police box and residential police box
- Fire station
- Bridge
- Boundary line
- Railway and the Hokuriku Shinkansen

List of facilities available for the people requiring consideration

No.	Names of facilities	Location
1	Kitagata Child Care Center	36-17-2 Kitagata
2	Care heights Awara	18-11 Yokogaki
3	Awara Hospital	238-1 Kitagata
